

Gisan Geff Raniego

Full-Stack Web Developer | System Analyst

Davao City, Philippines | +63-948-777-6849 | gisangeff@gmail.com

GitHub: github.com/nicegood123 | Website: gisangeffraniego.com

PROFESSIONAL SUMMARY

Full-stack web developer and product/code owner who builds and maintains web systems from requirements through release. Hands-on with Laravel, Livewire, Vue, APIs, QA, code review, deployments, and production support. Uses AI-assisted tools thoughtfully to accelerate delivery while keeping code, testing, and technical decisions reviewed.

TECHNICAL SKILLS

Laravel, Livewire, PHP, MySQL, Tailwind CSS, Bootstrap, Vue.js, JavaScript, Git, GitHub, Alpine.js, jQuery & AJAX, Postman, Figma, QA & Code Review, Docker, Linux, REST APIs, Deployments & DevOps, AI-Assisted Development (Codex, GitHub Copilot), AI Tools (ChatGPT, Claude)

WORK EXPERIENCE

System Analyst (Web Developer) | University of Mindanao

2024 - Oct 23, 2026

Product and code owner who also writes code for assigned internal systems and client projects, handling work from requirements and client communication through development, QA, and deployment.

- Own assigned products and codebases, guiding priorities, quality, and technical decisions from feature planning through release.
- Communicate directly with project clients, analyze requirements, and turn them into clear, actionable work.
- Write AI-agent-ready GitHub issues; develop, review, and QA features; and fix bugs in systems used daily by students and employees.
- Contribute beyond assigned projects, improving code quality, reliability, and security by identifying vulnerabilities and opportunities for enhancement.
- Set up and maintain physical servers, deploy staging and production environments, and work with Docker while growing as a DevOps practitioner.

Web Developer | Freelance

2022 - 2025

Partnered with small businesses and startups to build and maintain websites and web apps that help them reach their goals.

- Designed and implemented responsive interfaces with Tailwind, Bootstrap, Livewire, and Vue.
- Integrated REST APIs, authentication, and background jobs with production observability in mind.
- Led deployments and post-release hardening to keep uptime and performance steady.

Web Developer | Mediaone PH

2022 - 2023

Handled backend development and deployment setup for the Paw Tracer web and mobile app, partnering with the team to keep releases smooth and stable.

- Built Laravel features, authentication, and data workflows powering daily users.
- Coordinated with designers and project managers to scope and deliver milestones on time.
- Set up and deployed application environments to support reliable releases.
- Optimized database queries and API responses to improve app performance and reduce load times.

SELECTED PROJECTS

University of Mindanao Alumni Portal

apmain.umindanao.edu.ph

Portal for alumni access and engagement.

AMFM Racing

amfmracing.ph

Management system for the Davao Hot August Race drag-racing event, held annually during Kadayawan, and the Davao City Athletics Open track and field competition.

University of Mindanao Student Portal

student.umindanao.edu.ph

Student portal for accessing university services and information.

University of Mindanao ERPS

erps.umin.edu.ph

Enterprise resource planning system supporting university workflows.

TypeFlow

Tailwind CSS, Vue.js

type-flow.gisangeffraniego.com

Interactive typing practice app with timed challenges, live WPM tracking, accuracy statistics, sounds, and randomized practice content.

The Sample Maker

Laravel, Livewire, MySQL

the-sample-maker.gisangeffraniego.com

Website for a handcrafted leather-goods business offering custom bags, saddles, motorcycle accessories, and everyday leather pieces.

ClearPath Consulting

Laravel, Livewire, MySQL, Tailwind CSS

Business consulting website focused on helping small and medium-sized companies improve workflows, operations, and systems.

Kanto Brew

Laravel, Livewire, MySQL, Tailwind CSS
